

Energy Management Program  
Consent Form

Consent to Install Demand Response Unit (DRU)

Please read carefully and thoroughly.

I consent and agree to have a Demand Response Unit (DRU) installed on my electric water heater, and/or central air conditioner and/or heat pump for the purpose of reducing the kilowatt demand during South Central Indiana REMC's peak load situations. The DRU will be installed in a timely manner by an SCI REMC employee or contractor.

I understand that there will be no charge to me for the DRU equipment, its installation or removal, and that the DRU equipment shall remain the property of SCI REMC.

I agree to permit SCI REMC employees and its contractors to come on my premises at reasonable hours and with prior notice to install the DRU, to conduct maintenance, and to replace the control receiver as necessary.

I understand that the water heater, and/or central air conditioner and/or heat pump will be controlled in a diligent and reasonable manner.

**A Demand Response Unit can be set on the following systems. Please mark your choices.**

Central Air ~ eligible for \$50 one-time credit \*\*\* (not eligible with rebate)

**OR**

Heat Pump ~ eligible for \$50 one-time credit \*\*\* (not eligible with rebate)

50 gallon (or higher) electric water heater ~ eligible for \$25 one-time credit

\*\*\* Not eligible for credit if you received a discounted water heater

We do require the water heater to be installed within **15** days from time of pick-up. Failure to install within that time frame or installing at a different location will result in being billed the full retail amount for the water heater.

One of our contractors will be calling you to set an appointment for the Demand Response Unit installation.
