New "Beat the Peak" member program offers opportunity to minimize costs

South Central Indiana REMC is pleased to introduce "Beat the Peak." This new voluntary program encourages members to become more aware of the energy they use, and to reduce their energy usage during Peak demand periods. Peak demand periods occur when the demand for electricity is the highest and when the weather is very hot or very cold. As part of "Beat the Peak," members who choose to participate will be asked for their involvement during the months of June through August, and December through February. During these months' Peak periods, the REMC is charged a higher cost from our power supplier, Hoosier Energy.

[Read more](#) about how you can participate in the new voluntary program, and help minimize cost increases.

Tudor looks at future of electricity

"Without electricity our great nation would not be so great. Our quality of life relies on reliable and low-cost electricity."

These thoughts are part of a perspective provided to SCI REMC members from the President and CEO of ACES Power Marketing, David J. Tudor. [Read Mr. Tudor's complete article](#), in which he comments on the future of energy consumption, education, and development of greener and more sustainable electricity in Indiana and throughout the United States.

Gosport resident's home saved by quick response, SCI security system

On a cold morning in January, Gosport resident Linda Nott received a call she will never forget. Linda was away from home at the time, so when the smoke alarm sounded of a possible fire and the central dispatch center for her SCI Services alarm system couldn't reach her, they contacted the fire department, then alerted Linda's son and daughter-in-law from her security system's contact list. The result: although damaged, Nott's home was saved due to the quick response afforded by her security system and the local fire department.

The Nott's fire-damaged home survived, thanks to a quick response.

"Just the thought of losing my home and all of my possessions was distressing. I was so pleased with the quick response and the fact that SCI's security system saved my home," said Nott.
